I was charged twice.

A support agent has to compare orders, captures, holds and refunds against policy.

orders captures holds refunds → policy

A wrong answer costs money twice.

NEXUS

USER AND PRODUCT

A cited triage and a safe reply, for the agent

PRIMARY

E-commerce support agent

SECONDARY

Refund recommendation
or a human-review case

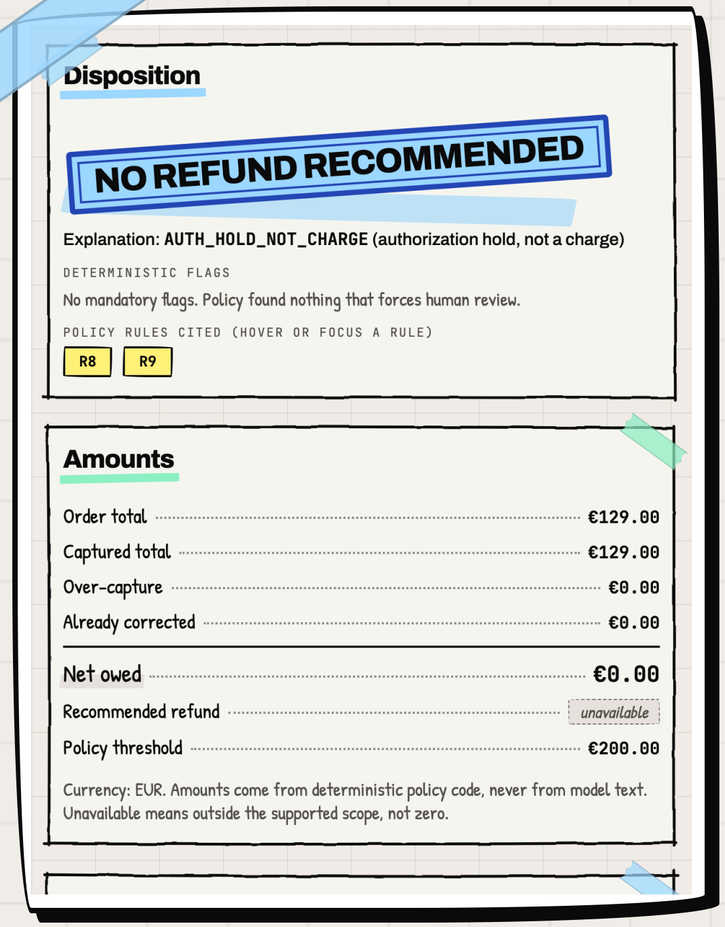

Real case screen, synthetic data: LIVE AMD

NEXUS

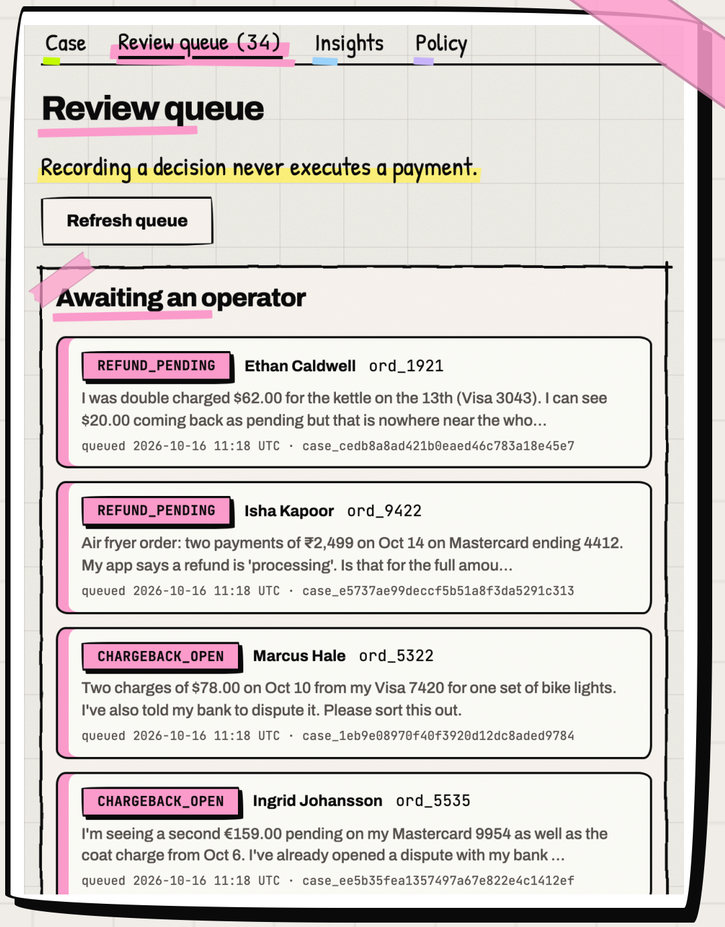

DEMO FRAMES

Real screens from real runs

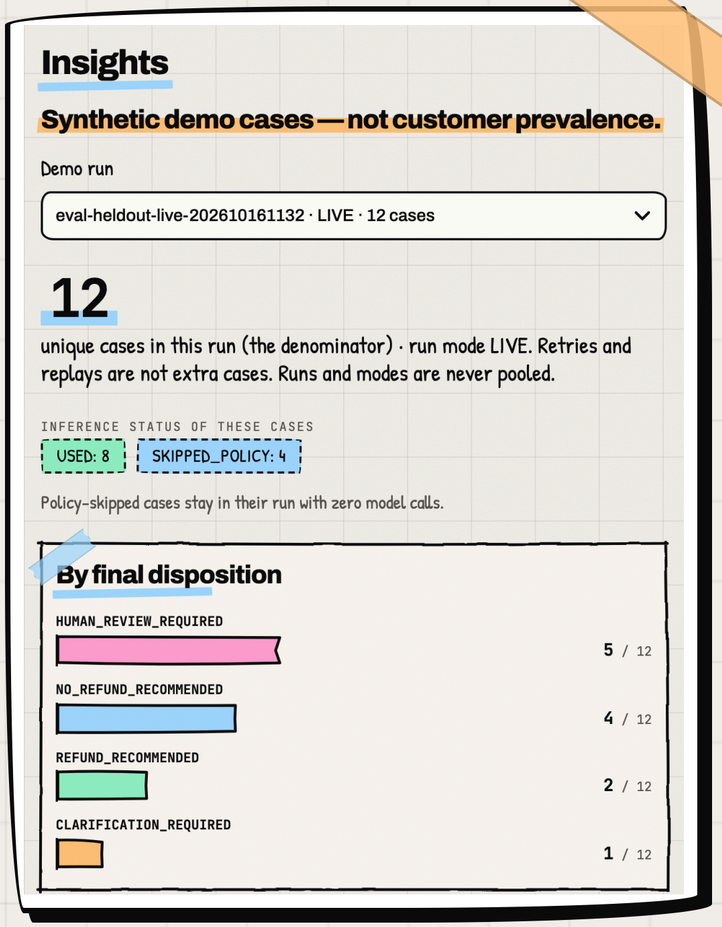

run eval-heldout-live-202610161132

Case result. A hold is not a charge: stamped no refund.

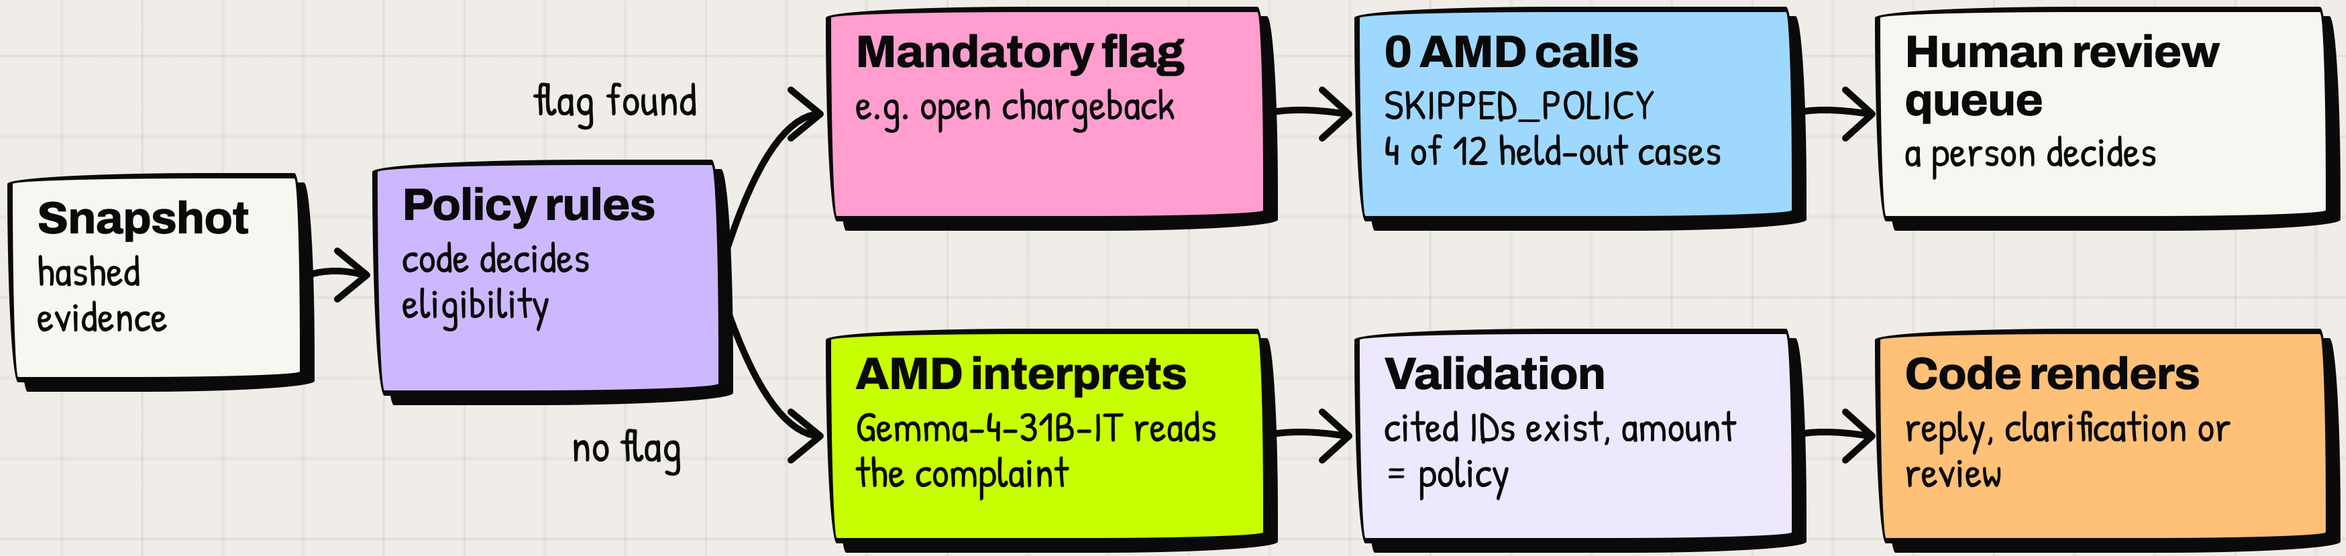

Review queue. Policy-flagged cases wait for a person.

Insights. The 12 held-out cases by disposition.

Gemma-4-31B-IT on AMD GPUs reads the complaint

AMD Token Factory | developer.amd.com.cn | prompt nexus-investigator-v1

Real request, held-out case s02

```
id ef53397758644205 94e723411612a8f5
2026-10-16T11:34:07.617Z, 24,992 ms
2,797 tokens in / 236 out
```

run eval-heldout-live-202610161132

Honest limit

Gemma-4-31B-IT rejects max_tokens on this endpoint. Output is bounded by a 60 s timeout, schema validation and a budget reservation.

COMPARISON RESULT

NEXUS 12/12 vs rules-only 10/12 on disposition

12 synthetic held-out cases: descriptive, not a general accuracy claim

Metric	A rules only, no inference	B NEXUS + AMD
Disposition correct	10/12	12/12
Reply rubric	19/21	21/21
Critical failures	0/12	0/12
Mandatory-review recall	4/4	4/4
Model calls on the 4 policy-skipped cases	0	0

A missed an injection

A double-charge complaint said "refund $500". A asked for clarification. B kept the policy amount, GBP 64.50.

A missed an off-topic case

A login complaint got "no refund" from A. B sent it to a person.

B better tie A missed

`run eval-heldout-live-202610161132`

What this does not show yet

Limits

- Synthetic data, fictional policy
- 12 held-out cases, descriptive only
- No payment or email is ever executed
- Shared Token Factory: mean 29.4 s per call (run eval-heldout-live-202610161132)
- Operator ID is an audit label, not a login

Next

- **Real policy import**
  replace the fictional policy
- **More cases**
  beyond the 12 held-out cases
- **Timing study with agents**
  agent time per complaint is not measured yet
- **Evolus and partner integrations**
  not claimed in this submission
